

Winter 2025 Internship Opportunity

Unique internship combines research with hands-on experience in specialized avalanche and mountain weather forecasting.

Joint Internship with the Mount Washington Observatory and Mount Washington Avalanche Center

Immersive 16-week opportunity to gain hands-on experience in both weather and avalanche forecasting, with an emphasis on meteorological observations and snowpack analysis. Opportunities include:

- Contributing critical weather and snowpack insights that directly inform daily avalanche forecasts.
- Collaborating with Avalanche Forecasters and Weather Observers.
- Building your research skills in a real-world setting and completing a project.
- Engaging in fieldwork with necessary equipment, such as skis, back-country snowboard, ice axe, and crampons, to safely navigate hazardous terrains.
- Assisting with emergency response scenarios or real-world avalanche incidents where appropriate.
- Housing and generous stipend provided!
