

## **North Conway, NH (NCON3) Monthly Weather Summary**

### **November 2025**

#### ***Summary***

November, and fall of 2025 continued a pattern of drier than normal weather; however, extreme drought conditions have improved somewhat and are now characterized as severe, according to the the United States Drought Monitor. A total of 2.51 inches of precipitation was recorded for the month of November, falling well short of the climatological average of 4.47 inches. Meteorological fall, defined as September, October, and November, also saw a combined deficit for precipitation that totaled 9.88 inches, or 3.72 inches below normal.

Cooler conditions prevailed for most of November in North Conway, with temperatures struggling to reach the 50F mark on most days. The first snowfall of the season was recorded as graupel showers (also known as snow pellets) on the 5<sup>th</sup> to 6<sup>th</sup> and again on the 6<sup>th</sup> to 7<sup>th</sup> resulting in just a trace. The first accumulating snowfall was recorded just two days later on the 8<sup>th</sup> to 9<sup>th</sup>. A total of 1.3 inches of snow was recorded for the month, falling 3.5 inches below normal. At the time of writing, the first inch of snow on the ground was observed on the 30<sup>th</sup> to 1<sup>st</sup> along with signs of more significant snowfall to come.

As we look ahead to December, North Conway averages 16.9 inches of snow, making it typically the third snowiest month during the year behind February (21.8 inches) and January (20.1 inches).
